Strategic Leadership and Change Management for Directors and Senior Managers

2nd – 6th October 2017

Pretoria, South Africa

Course Overview

Leadership is key to stimulating innovation, driving change and to deliver results in increasingly competitive and complex circumstances. Designed for senior executives, this programme will stimulate you to think about your contribution as a leader, whatever your role. We will help you to lead strategy, including the inevitable organisational politics that accompany this process, as well as lead teams and drive change.

Change Management is a critical skill and this course has been designed to look at the fundamental challenges in getting people to change their patterns of behaviour and their working practices and adopt the new methods that result from the implementation of change. The course involves a great deal of participation to answer questions posed by the trainer and to share understanding of the concepts of change management with other learners.

Learning Objectives

Participating Delegates will have a clear demonstrable understanding of:

- Develop an effective set of leadership skills necessary to influence others.
- Learn from top professionals through interactive presentations, case studies, evaluations and group mentoring.
- Understand the effects of different leadership styles on the change process
- Contribute to your organization's competitive capabilities with adept skills at crafting effective policies and practices to streamline business.
- Interact with Your People to Maximize Their Performance and create a Motivational Environment
- Identifying risks and assigning roles such as change sponsors and change agents

Who Should Attend?

- Senior managers and directors wanting to review their current approaches to leadership and discover new capabilities
- Those looking for leadership development to support a promotion
- Recently promoted executives facing significant leadership challenges for the first time
- Senior executives looking to learn from the experiences of other business leaders.
